DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 2, 5, 6, 11 and 13-16 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record, neither anticipates nor renders obvious the following limitations as claimed:

1. a) With regards to claim 1, the prior art fails to suggest fairly an electromechanical shutter mechanism comprising at least one individual shutter hingedly attached with respect to said substrate and moveably associated with the at least one pixel and having a first position and a second position that are selected according to commands from the processor of the digital camera, the first position exposing the at least one pixel to the light from the object and the second position preventing the exposure of the at least one pixel to the light in combination with other claimed elements.
2. With regards to claim 11, the prior art fails to suggest fairly a method for an image capturing device to control pixel exposure of a plurality of pixels on a substrate, the image capturing device including a shutter mechanism that provides a first shutter setting and a second shutter setting, the method comprising arranging the plurality of pixels to operate with the shutter mechanism such that the first shutter setting provides the plurality of pixels with exposure to a light source and the second shutter setting prevents the exposure of the plurality of pixels to the light source constructing the shutter mechanism to be hingedly attached with respect to the substrate in combination with other claimed elements.
